SKILLS

Java || JavaScript || Python || C# || C++ || HTML || Unity Game Engine || Git + Git LFS || GitHub || SQLite || SQL || Linux || Microsoft Office || PC/Mining Rig building || Qt Creator || Visual Studio || Mining Cryptocurrency

PROJECTS

The Recipe Application November 2022 – December 2022

https://github.com/Savant-sys/The-Recipe-Application

- I've developed the recipe application on PyCharm with python using the website's database for the recipes information called TheMealDB.

The Block Jumper September 2022 – December 2022

https://github.com/Savant-sys/The-Block-Jumper

- Developed a mobile game on the unity game engine with C#.
- Coordinating a team of 5 programmers to develop the game using GitHub with Git Bash + Git LFS.
- Assembling the concepts of software engineering to practice team working efficiently using the Agile method.

Blackjack Game September 2022 – December 2022

https://github.com/Savant-sys/Blackjack-Game

- Developed a game on PyCharm with Python.
- The text file can be changed by the program for money balance.

College Touring March 2022 – May 2022

https://github.com/Savant-sys/College-Touring

- Developed in C++ on Qt Creator using Database SQLite.
- Coordinated a team of 4 programmers to develop the data structure practice using Git/GitHub.
- Used the data structures to simplify the calculations easily using Hashing, Dijkstra, BFS, DFS, and MST.

Food Fantasy January 2022 – March 2022

https://github.com/cs1dlebo/Food-Fantasy

- Developed in C++ on Qt Creator.
- Coordinated a team of 4 programmers to develop the data structure practice using Git/GitHub.
- Used the data structures to simplify the calculations easily using Multimap, Map, and ADT.

Table Tennis Game March 2019 – May 2019

https://studio.code.org/projects/applab/2JA08Nke9iuYcZUdZHtnTb27Yc67424NHQfQzAJwd4w

- I've developed a game with JavaScript on Code Studio.
- Two players can play with each other on the same keyboard by arrow and WASD keys.

Pirate Ship Game October 2018 – December 2018

https://studio.code.org/projects/applab/9F9zA96PI2__OC4URjdyFGyobeXOxntitbp2-RlKtBE

- Developed a game in JavaScript on Code Studio.
- A player can play on the keyboard controlling the wings with arrow keys.

LEADERSHIP/ACCOMPLISHMENTS

Association for Computing Machinery Club Present

- Developing knowledge of Data Structure.
- Competition programming, learning coding languages, teamworking skills, and interview practices.

Society of Asian Scientists & Engineers Club Present

- I'm responsible for the community of this club to stay in touch with what is happening around events for tech students.

EDUCATION

Saddleback College, Mission Viejo, CA Present

Bachelor of Science in Computer Science

Dean's list, Certificate of Achievement - IGETC

California State University, Fullerton, Fullerton, CA Present

Bachelor of Science in Computer Science

Core Courses: Data Structure || C++ || C# || Java || JavaScript || Python || Professional Ethics in Computing || Software Engineering || Web Development in HTML
